

Write a Java program for addition of 2 numbers by taking input from the keyboard ?

```
import java.util. Scanner;
class Demo
{
    public static void main (String [] args)
    {
        Scanner scan = new Scanner (System.in);
        System.out.println ("Enter 2 numbers");
        int a = scan.nextInt ();
        int b = scan.nextInt ();
        int c = a+b;
        System.out.println ("Addition result: " + c);
    }
}
```

Output:

The screenshot shows the Eclipse IDE with a Java project named 'SampleEtc/kodNest/Program2.java'. The code in the editor is as follows:

```
1 package kodNest;
2 import java.util.Scanner;
3 public class Program2 {
4     public static void main(String []args)
5     {
6         Scanner scan=new Scanner(System.in);
7         System.out.println("Enter 2 numbers");
8         int a=scan.nextInt();
9         int b=scan.nextInt();
10        int c=a+b;
11        System.out.println("Addition result:"+c);
12    }
13 }
```

The console output shows the program running successfully, with the input '10' and '20' and the output 'Addition result:30'.
